NEW FACILITY--Aerial view of Santa Fe Railway's new \$5 million tie treating plant at Somerville, showing treating cylinders, control room house, and tank farm in background. Locomotive at right is shoving a load of untreated ties into at treating cylinder while at left, a load of treated ties is emerging from a cylinder. Plant's capacity is 1.6 million vapor dried ties a year and is projected to meet the railroad's cross tie needs through the year 2000.

Milam-Areans

Stage Productions Planned

Five stage production, the final one to be an original script on the history of McGregor with a local cast, will be brought to this community during the next year by former resident Ronnie Hanneman in cooperation with the Bicentennial Commission. The plays will include, "Our Town," a musical "Tom Sawyer," "Johnny Appleseed," and "Skin of our Teeth."

Ambulance Service Shows Deficit

After six months of operation in Georgetown and Taylor, five months in Round Rock, and two months in Cedar Park, the Williamson County Ambulance Service has an operation deficit of \$37,971 (to the end of the second quarter.) Add to that capital expenditures of \$58,972 for vehicles, radio equipment and supplies, and ambulance costs for the county taxpayer mount.

Agents Prey On Elderly

Three complaints of fraudulent insurance agents operating in the City of Caldwell have been reported to the Hurlston County Judge. "These out-of-town agents have been preying upon the elderly, selling them insurance policies, that in effect, they can never use. The chances of anyone collecting from these companies are slim and poor," said the judge.

Attempted Rape Charged

Sheriff E. P. Elliott and Dep. Cecil Wingo, special investigator, arrested Audrie Fuller Jr., 27, in Hearne last Monday on a charge of trying to rape an 80-year-old woman in Calvert on July 24. The woman lived alone and the suspect asked for money before trying to rape her.

Football Star Charged

An 18-year-old former football star and spring graduate of Rockdale High School was charged last Friday with armed robbery in connection with the shotgun holdup of the Four Corners Grocery here on the night of July 26. Charged was Henry Beckwith Jr., a star running back and all-district footballer at RHS for the past two years.

PTA Gives Tennis Courts

At long last the Thorndale PTA's goal of giving a tennis court to the community is a reality. Total cost of the courts was \$14,300. Alcoa gave a grant of \$5,000 and PTA donations totaled \$4,500. The remaining \$3,000 must be paid before construction can be completed. Work remaining includes toping the courts and lighting.

Delinquent Tax Roll Increases

The highest delinquent tax list in many years was noted this year in the Rosebud school district. It amounts to 5 1/2 percent up from 1 1/2 percent from the year before. Tax rolls have been completed and total \$56,615. This is up from last year's roll of \$47,187.

Rep. Kubiak Raps League Report

AUSTIN
Rep. Dan Kubiak took the Texas Research League to task Thursday, contending its July 28 report on school finance misinterpreted the new education law's impact on local property tax levels.

The League report, titled "The New State School Aid Plan: Facts v. Fiction," concluded no school district would be forced to raise local property tax levels next year under the education bill approved by the 64th Legislature.

According to the report, Kubiak said, local districts can pay the higher cost of the new education system by siphoning off property tax money formerly spent on locally financed education programs.

However, since the new state education law does not encompass all the programs which have been financed locally, the transfer of funds can force school district to either increase property taxes or terminate some educational services, Kubiak said.

"Athletic programs, payment of debt, and other costs are not included in the new education law, so many school districts must either increase their tax rate or do away with part of their school system," Kubiak said. "The League report failed to mention this fact, evidently assuming that athletics or debt service have to do with the educational process."

Kubiak said the League report was essentially correct in its assessment of the core educational programs in the new "Foundation" plan approved by the legislature, but he stressed that most school systems offered programs beyond Foundation coverage.

"Faced with the choice of depriving children of long-standing programs or raising taxes, most school boards will opt for the continuation of the programs," Kubiak said. "So in a practical sense, the new education law passed by the legislature does in fact prompt the many tax increases we have been seeing lately."

Buckholts Man Injured When Car Strikes Train

A Buckholts man remains in serious condition in the Veterans Administration Hospital in Temple after his car struck a train near Buckholts Tuesday evening.

A Veterans Hospital spokesman said the condition of Melvin Allison, 50, remains serious in the surgical intensive care unit after his car struck a west-bound Amtrak train about a mile east of Buckholts.

Allison was alone in the car at the time of the accident. Highway Patrolman Milton Wright investigated the collision.

Pre-School Band Workshop Opens Monday

Monday, August 11 will begin a two-week pre-school summer band workshop for both junior high and high school bands.

This year marks the first time the junior high band will play at all the home games with the possibility of marching in the last couple of home games.

The junior high band will rehearse Monday through Friday from 9:30 until 11:30 a.m. at the Yoe High School band hall. The Yoe High band will rehearse Monday through Friday from 7 until 9:30 p.m. in the high school band hall.

Jerry Bartley, band director, and Gary Beach, assistant, urge all members to be present for the rehearsals. The bands will work on new music and fundamentals of marching.

To clarify a misunderstanding concerning sixth grade band and athletics, it is noted that any student can now participate in both band and athletics from the sixth grade through twelfth grade.

Grant Received For Alcohol Council

Senator William N. (Bill) Patman announced today that the Central Texas Council on Alcoholism has been re-named the Regional Alcoholism Authority for State Planning Region 23 for the fourth consecutive year.

The area comprises Bell, Milam, Coryell, Mills, Lampasas, Hamilton, and San Saba counties. The designation carries with it a grant in the amount of \$18,955 from the Texas Commission on Alcoholism.

Gene Howell, executive director of

Central Texas Council on Alcoholism, said that the council, a United Way agency, supplied \$11,120 in matching funds. All the funds are used to bring about prevention, control, and treatment of alcoholism and alcohol abuse in Central Texas.

Central Texas Council on Alcoholism maintains an Information and Referral office in the First National Bank Building, Temple, Texas (phone 773-3722).

Poage Library Gets Alcoa Grant

The Alcoa Foundation Wednesday awarded a \$20,000 grant for the W. R. Poage Congressional Library to be constructed on the Baylor University campus.

Alcoa's Texas Area Manager Fred P. Bergeron of Rockdale made the presentation to W. W. Callan, chairman of the library project board at luncheon ceremonies attended by Cong. Poage.

Other Milam County representatives were Narvie Caperton and Hal Reagan, both members of the Poage Congressional Library steering committee. Caperton is also a member of the nine-man project board.

The one million-dollar library will house Cong. Poage's papers and documents from his years of service in the U. S. Congress.

"Cong. Poage has represented the Central Texas area in the nation's capital for nearly 40 years," Bergeron said. "and we are delighted the Alcoa Foundation has awarded this grant to help construct a library to both house his papers and provide an outstanding campus facility for students at Baylor."

Construction of the library is scheduled to begin by the end of the year and should be completed in 18 months to 2 years, Callan said. Baylor

Poage's alma mater, donated the land for the facility and will staff and maintain the library upon its completion.

Tentative plans call for the building to include a rotunda, reading and research rooms, stack area, lounge area, a replica of Poage's Washington office, microfilm center, staff offices, receiving and analysis room, reference room, and four study cubicles.

In addition to Poage's papers and documents of the House Committee on Agriculture, other congressmen have expressed interest in placing their

papers in the library because of its Central Texas location.

The fund raising committee was successful in soliciting funds from both Poage's district and nationwide, Callan said.

The Alcoa Foundation, a non-profit organization, annually awards grants totaling \$100,000 in Texas alone, Bergeron said.

The Alcoa official said this is the second major Alcoa Foundation grant for new buildings at Baylor in the last two years. He reminded that a \$10,000 grant went to the school's new Castilla Communication Center in 1973.

RIBBON CUTTING ceremonies for the new Perry store (Thursday morning) is shown here with company officials and Mayor Gene Blake, right, with the scissors. At far left is William Kelm, president of the Cameron Chamber of Commerce, and Perry Bros. officials, J. L. Calloway, R. Spurgeon, M. Sheffield, Johnny Bell, manager; Bill Woodruff, and J. Lawrence. The store's opening attracted a large crowd.

Britain May Leave North Ireland

By Seaghan Maynes

BELFAST

Reuter--Suspicion is increasing among Protestant politicians and people that Britain has prepared contingency plans for a political and military withdrawal from its violence-prone Northern Ireland province.

They believe such a move result from the major change of policy which the British government has warned would follow a failure of the bitterly divided Protestant majority and Catholic minority political parties to agree on a new power-sharing form of government.

After failing to impose its own military and political solutions in Northern Ireland the British government tossed the problem to the people of the province to settle themselves through a constitutional convention.

The 78-member convention, which met last May and is now in summer recess, has the daunting task of producing an acceptable formula for partnership in a future government to replace the present direct British rule.

The trouble is the Protestant unionists, who have a convention majority, adamantly refuse to accept the Catholics as cabinet colleagues in any new administration, despite British insistence on partnership as the only hope of peace.

Without some miraculous change of heart, which few foresee, the convention seems doomed to fail.

The hardline Protestant

politicians, ignoring British and Catholic objections, are demanding a return to the government control they enjoyed with their built-in majority after Northern Ireland was partitioned from the rest of Ireland in 1920.

The exclusion of the Catholics from any say in the old administration was a root cause of the guerrilla fighting over the last six years.

The British government is desperately anxious for a home-produced solution from the convention but it will not disclose its plans if this does not materialize and the province is plunged back into violence.

The reluctance to specify future policy, despite urgent pleas from worried politicians, has helped strengthen the feelings that the British government is seeking some way to shed its Northern Ireland responsibilities and get its 14,000 troops back home.

The middle-road Alliance Party's newspaper reflected the views of most moderates that if the convention experiment was wrecked by

Protestant intransigence, "British indifference to Northern Ireland could quickly turn to revulsion."

In the background is a threat by the provisional wing of the predominantly Catholic Irish Republican Army (IRA) to call off its six-month-old cease-fire and resume guerrilla operations if there is no early British declaration of intent to leave

The end of the cease-fire would mean not only a conflict with the British army and police but with the Protestant paramilitary organizations like the Ulster Defense Association (UDA) and the Ulster Volunteer Force (UVF). A new terror campaign in Mainland Britain with bomb attacks on such vulnerable targets as the London subway system could be expected as was made clear by discovery of an IRA arms cache in Liverpool a few days ago.

The objective would be to create an outraged reaction from the British public that would force the government into quitting Northern Ireland.

Anxieties about Britain's willingness to maintain the links with the turbulent province are heightened by reports of secret deals with the IRA.

A main source for these reports was the Reverend William Arlow, a Protestant clergyman who was involved in the peace talks that led to the IRA cease-fire.

Arlow, who is secretary of the Irish Council of Churches, said that in the cease-fire negotiations, the British government gave the IRA a firm commitment to withdraw the army if the constitutional convention collapsed.

Firm denials by Britain's secretary for Northern Ireland, Merlyn Rees, of such a commitment and his pledge that there would be no sell-out of Northern Ireland failed to appease furious Protestant leaders.

There were angry protests and threats from them and the paramilitaries. The hardliners attitude was, "If Britain deserts us, we will go it alone."

The Reverend Ian Paisley, the crowd-rousing leader of the Democratic Unionist Party, called on Protestants to prepare for a British pull-out and be ready to defend the north and their Protestant heritage.

This was swiftly followed by a UDA announcement that separate paramilitary groups had joined together in a single Loyalist army with a unified command.

At the same time there was talk of plans to form a provisional Protestant unionist government to take over when the British left.

Whether or not there was any secret deal of understanding with the IRA, the fact is that Britain wants to get the troops out as soon as security situation allows. Rees repeatedly has said an end to violence would be followed by a "planned, orderly and progressive" reduction of the British military presence.

Since the cease-fire was declared last February, there has been a marked reduction in British army operations and more security duties have been taken over by the police and the locally recruited Ulster defense regiment.

The troops, however, have to deal, along with the police, with recurrent outbreaks of sectarian-motivated bombings and shooting as

well as bloody internecine feuds within the Protestant and Catholic private armies.

An unusual development in the tortuous maze of Northern Ireland politics is the emergence of a growing independence lobby within the unionist ranks.

Since the province was created, the Protestants always have proclaimed unwavering loyalty to the union with Britain as the mother country and a shield against absorption into the predominantly Catholic Irish Republic.

Letters

Dear Mr. Luecke:

Your idea of a bakery in Cameron sounds great, has a rather nostalgic effect on you. For what is better than a good old-fashioned bakery, with all of the baked goods made from unbleached flour, on your super market shelves in Cameron, with none of the wonderful nutrient value removed by bleaching it.

Respectfully,
Rebecca Miles
Cameron, TX

Dear editor:

Enjoy reading the paper. As you probably know, Tysons have been in Milam County for a long time, and I'm proud of Cameron and what you all have accomplished recently.

Frank Tyson
Houston, TX

While an American politician runs for his office, an English politician merely stands for his.

The Carrillo Trial...

Duval County Dist. Judge O. P. Carrillo is going before the Texas Senate September 3 to be tried on 10 articles of impeachment voted by the Texas House.

None other than Houston's Leon Jaworski, fresh from Watergate prosecution, will be special counsel in the case, working gratis.

Rep. Dan Kubiak, of Rockdale, thought Carrillo's case should have gone to judicial council which could have recommended to the Texas Supreme Court on the case.

Kubiak anticipates costs up to a half-million dollars for impeachment and trial for the Duval judge.

It's been about 40 years since Texas has gone through the impeachment process. Governor Ferguson was the last state-level figure to be

impeached prior to a judge and other lesser lights.

It is a serious business, one that Kubiak says could be settled at the lower level because it is a political hassle between Carrillo and Parr forces in Duval County.

That may be true. But the example of bringing a district court judge to trial out of such political circumstances may tend to discourage provincialism in state courts and in the handling of public funds in one of the 254 Texas counties generally considered unique in the way things are done.

With Jaworski at bar, Texans can be assured justice will be tested about efficiently as 31 senators, many of whom are lawyers, as trial or review court in the country.

Humbling Snoopy...

Snoopy usually is equal to anything in the "Peanuts" comic strip which stars Charlie Brown and the impertinent Beagle.

But the other day, Snoopy is setting atop his dog house putting down a neighborhood cat and bragging about his brother Spike who's due to visit.

"He (Spike) eats cats! When he gets here, I'm gonna send him over to punch

you in the nose! What do you (the cat) think about that?"

There's no answer. Only SLASH! Snoopy looks down at part of his missing dog house roof.

"I should never ask him (the cat) what he thinks about things," Snoopy says. And humbling.

It's about the first time we've seen Snoopy at a loss for anything.

SOME GOOD NEWS

from your electric power people.

This is a message for all of those people who long for some good news. It's from your electric people, Texas Power & Light Company.

Yes. We know that the news we've been sending your way has been anything but good. Shortages and spiraling costs of the fuels needed to generate electricity. High interest rates on the money we must borrow. Increasing costs of construction, materials, equipment and all of the other things necessary to produce and supply electric power.

And all of these problems have brought about the inevitable... asking our customers to pay more for the electricity they use.

But wait, there is some good news.

We're working in every possible way to prevent the "blackouts" and "brownouts" which have occurred in some parts of the nation.

We placed a large generating unit in operation late last year and another in May of this year. Six additional generating units, all to be powered with readily available lignite coal, are under construction and four other units are in the planning stages.

We've begun construction, along with two other companies, of a nuclear-fueled generating plant. The first of two generating units is scheduled to be placed in operation in late 1980 and the second in 1982.

We've built and are continuing to build, the lines, substations and other facilities needed to supply the power produced by all of these plants.

We're filling massive storage tanks with more than 80 million gallons of fuel oil for use when natural gas supplies are curtailed.

We're participating in the support of research programs to find ways to produce power more efficiently and more economically by conventional methods and to develop new methods.

Texas Power & Light provides electric service to more than half a million homes, farms, businesses, industries and institutions throughout North, Central and East Texas. We're working to keep this service adequate and dependable, but it's costing more all the time to do the job.

TEXAS POWER & LIGHT COMPANY
A tax-paying, investor-owned electric utility

"Low Down"

FROM THE
Congressional
Record

By JOE CRUMP

(A Column for Readers Who Haven't Time to
Review the Congressional Record Daily)

BILL BACKS FIGHT TO BAN AEROSOLS

Rep. George Miller (California)... The Federal Task Force on Inadvertent Modification of Stratospheric IMOS... has just released a report by the professional group composed of representatives from agencies involved with scientific environmental and related matters. Participants include, among others, the Federal Council for Science and Technology, the Council on Environmental Quality, the National Institute of Environmental Health Sciences, and the Environmental Protection Agency.

"As a co-sponsor of H.R. 4327, which would mandate a year-long study of the impact of aerosols on environmental quality, I look upon the IMOS report as being extremely valuable... The United States consumes a billion pounds of fluorocarbons a year. Indeed, fluorocarbon production has been dou-

bling in this country every 6 years. A direct impact of this increasing usage, which may be of "considerable significance" to people's health, is the steady shrinking of the ozone layer surrounding the Earth since 1970...

"I would like to submit for the Record two articles which address this very critical situation..." (Excerpts follow):

What To Use Instead Of Aerosols
By Judy Heckman)

Plenty! Alternatives are right there on the shelves. Often they're overwhelmed and hidden by the vast array of their aerosol packaged counterparts.

Ovens: Try to avoid spills in the first place. For wiping up spills use 1 tablespoon vinegar plus 1 quart water or place 1/2 cup ammonia in a closed, warm oven. Leave overnight and wipe up the grease in the morning.

Shave Lathers: Substitutes squeeze tubes, soap and mug.

Hair Care Products: Substitutes; containers using mechanical spray pumps; squeeze tubes; glass and plastic bottles and jars.

Insecticides: Substitutes; containers using mechanical spray pumps; (flint guns) paper or plastic chemical bug killers; glass and metal containers; shaker top compost cans.

CRUMP'S GRASS ROOTS COMMENT

What other countries are concerned with the shrinking ozone layer?

The U. S. Consumer Product Safety Commission has rejected a petition which asked for a ban on fluorocarbon propellants in aerosol sprays. But at least 6 government agencies refuse to take "no" for an answer. The fight continues.

One-inch solid lumber paneling gives more heat resistance than four inches of brick.

World's Best Scarecrow Is Purple

"The world's best scarecrow," says a veteran backyard gardener, "is my purple martin birdhouse."

What's scary about a birdhouse? The inhabitants: Purple martins not only put a fine-feathered fear into such vegetable garden villains as crows, but they also snap short the lifespan of countless insects, a single martin gobbling perhaps 2,000 a day.

This summer as homeowners across the country fight inflation with vegetable gardens, they welcome these tireless birds, the National Geographic Society says.

However, they may have to be content with the stray martins that make a pass over their plots until they can learn how to lure a whole flock of them to set up neighborly housekeeping.

"Togetherness" Bird

That is not easy, even though "togetherness" is the middle name of purple martins. Unlike most birds, but like some other swallows, purple martins like to nest in communities. When America was a wilderness they nested in woodpecker holes or in natural cavities in trees or cliffs.

However, Indians attracted martins to their villages by hanging up gourds with entrance holes cut into them. They welcomed the martins because they fearlessly chased away crows from crops.

Then purple martin birdhouses started sprouting on southern plantations, some houses with 40 to 50 apartments for two. Today birdhouses that big are found frequently, with perhaps the biggest in Griggsville, Illinois: a 40-foot tower of birdhouses with nesting accommodations for 500 pairs of purple martins.

They are the largest of all American swallows, about 7 1/2 inches long with a 16-inch wingspread, and have purplish-black plumage. Some say "martin" comes from Saint Martin because European martins migrate around Martinmas, November 11. In the United States martins begin arriving in early spring after wintering in South America.

Apartment Hunting

The first birds to find a purple martin house may be young males who fight fiercely for nesting compartments, and are joined soon by unmated females. Old mated birds may show up next, often establishing the birdhouse pecking order by tossing out the upstart newlyweds.

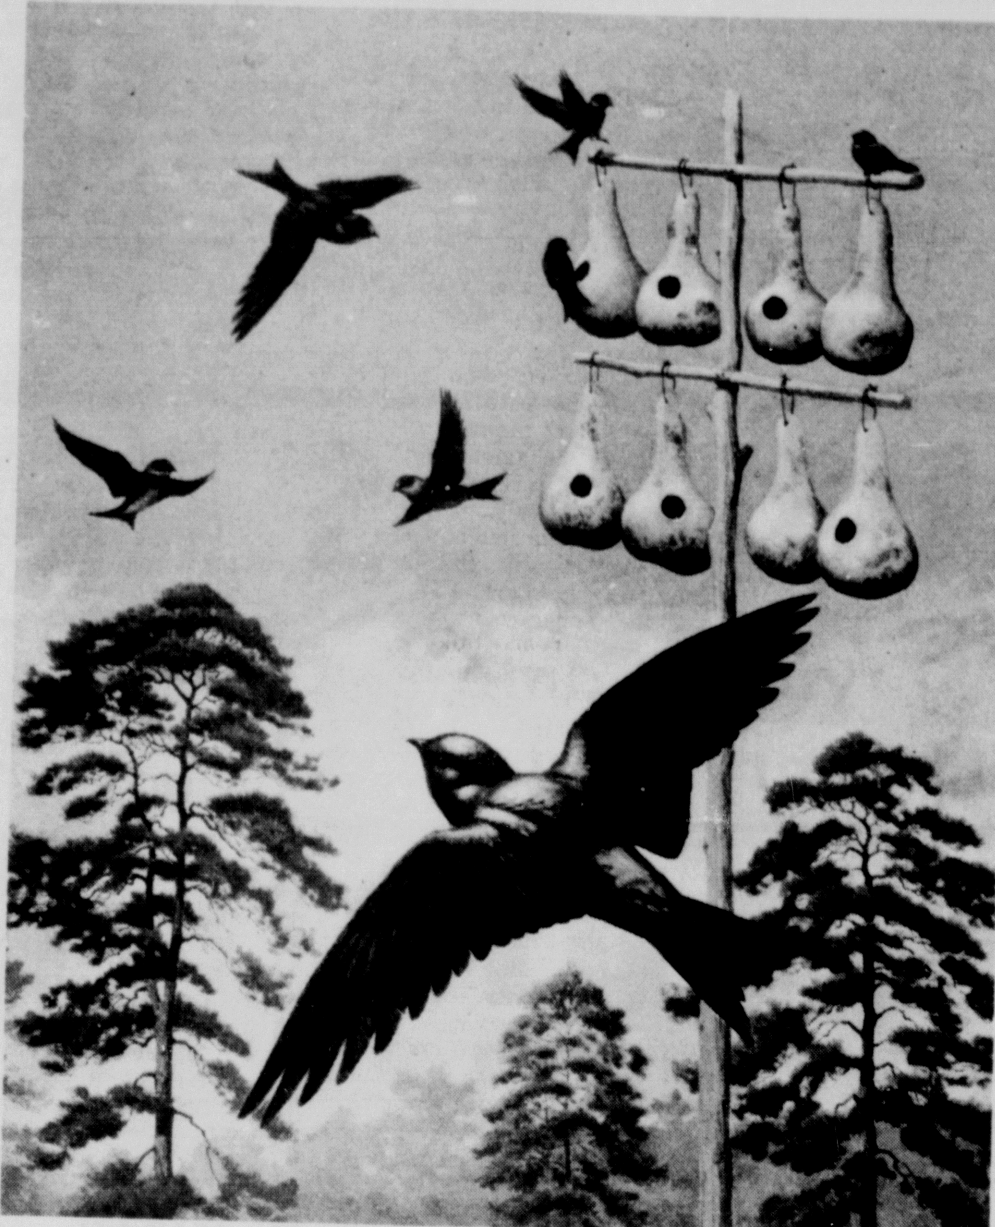

Martins also may myster-

iously shun even the most inviting houses, apparently unimpressed by miniature Victorian mansions and crested castles, preferring perhaps an old dead tree riddled with holes. They like shabby, weatherbeaten houses. Brightly painted ones may be too garish.

Homecoming humans can lose their way returning to a subdivision of hundreds of identical houses. But purple martins, arriving at a birdhouse apartment building, always know which door is home.

Sparrows and starlings may move into a purple martin

birdhouse and drive away the intended occupants when they show up later. So some gardeners keep the birdhouse holes corked up until the martins arrive. One man kept the would-be squatters scared away by ringing an electric doorbell he had nailed to the birdhouse.

LIVING SCARECROW, a mast of hanging gourd nests is home for a community of swiftly darting purple martins, voracious enemies of garden bugs. Gardeners prize

these swallows, largest in North America, because they not only help clear backyard plots of many insect pests, but also chase away crows and other crop-eating birds.

Interstate Highways To Cost Over \$100 Billion

Despite the fact that 86.2 percent of the planned 42,500 mile Interstate Highway System is now open to traffic, only 22 percent of the total system meets final Interstate standards.

This means, says the American Automobile Association (AAA), that the cost of building the remaining 5,884 miles and upgrading another 25,156 miles may consume as much as 50 percent of the total cost of building the entire Interstate highway network.

This cost estimate, according to Wm. M. Coffey, general manager, AAA, Texas Division, is based on projections by the Federal Highway Administration and the Public Works Committee of the U. S. House of Representatives.

"Most states built the easiest part of the Interstate first," says Coffey, "and because they rushed to get traffic on the highways, those sections were opened before they met final Interstate standards. Now we've got to upgrade those portions and build the most difficult segments in a time of high inflation."

The result, he said, is that the total cost of completing the Interstate System is likely to exceed \$100 billion, which means we still have to spend approximately \$50 billion.

In Texas, 385 miles of the state's designated 3,170 Interstate miles are still in various stages of construction.

Only 26 miles of the 2,769 Interstate miles open to traffic in Texas are adequate to meet Interstate standards. "It's going to cost \$150.8

million just to finish the work now underway in Texas," Coffey said, "with 90 percent of this coming from federal motor fuel taxes, federal excise taxes on tires and truck parts and accessories, and taxes on lubricating oils."

Revenues from these federal taxes Coffey explained, are deposited in the federal Highway Trust Fund for disbursement to the states to pay the federal share of the highway construction.

He pointed out that although

the Trust Fund had a balance of \$8.7 billion at the end of March 1975, \$21.4 billion has been apportioned to the states to carry out highway projects.

"This means," Coffey said, "that the Trust Fund is actually obligated for \$12.7 billion more than it has on hand."

Those opponents of the Trust Fund who want to use the taxes paid by highway users for non-highway purposes should consider that when they talk about the fund's 'bulging coffers'.

When someone spends thirty years reminding people to be careful with fire, and he does it for no other reason than to save our forests, he makes a lot of friends. Even if he's just a bear.

"ANYBODY HOME?"

A&M Has Police

Training School

Law enforcement officers in the seven-county area centered on Texas A&M University have their own handy training academy.

Like programs of the major city academies, it provides a full range of courses to help the officer become highly skilled in his profession.

The training is provided by the Police Training Division of the Texas Engineering Extension Service at Texas A&M University.

From basic certification of peace officers, through

courses in accident and homicide investigation, fingerprinting, crowd and mob control, probable cause and police photography, the programs meet certification requirements under the law.

UT Student Translates For Space Mission

A University of Texas doctoral student in Russian literature served as personal translator for CBS newsmen Walter Cronkite during the recent joint US-Soviet space flight.

Jane Knox worked with Cronkite and the CBS press team at the Kennedy Space Center, monitoring the launches of the Soyuz and Apollo rockets.

She also worked with NASA translators in Houston during the remainder of the space mission, monitoring Russian from the Soviet spaceship and Moscow newsmen.

Reuters International News Briefs

HAVANA

More than a decade of isolation formally ended last week for Cuba when the Organization of American States (OAS) voted to lift sanctions against the island. But long before the OAS vote in San Jose, the wall cutting off Cuba was crumbling. Several member states, which had reversed their policies and resumed political and trade relations with Havana.

PARIS

Violence, for criminal or political ends, has become almost commonplace in France despite government warnings of severe punishment for offenders. In June alone, 10 bomb explosions were reported resulting in the deaths of two people. One was planting a bomb when it blew up and the other victim was a news agency journalist who was apparently mistaken for a namesake.

BEIRUT

Four months after succeeding his assassinated brother, King Khaled is well established as the reigning monarch of Saudi Arabia, but the real power behind the throne is Prince Fahd. This is much as was predicted when the self-effacing Khalid, 62, was named by the royal family to take the place of King Faisal, who was shot by a nephew on March 25.

SYDNEY

Australia's new national health insurance scheme, Medibank, is proving a troublesome baby. The scheme was born on July 1 amid a storm of claims and counter-claims from its supporters and opponents. Modeled on a similar health insurance scheme operating in Canada, Medibank covers all Australians with subsidies for doctors fees and other health charges. It is funded by the Australian Labor government out of general taxation revenue.

PORT MORESBY

Papua New Guinea has finally decided what to do about its 37,000 foreigners after it achieves independence on September 16. Long-term residents will be allowed to stay as naturalized citizens but with restrictions on their business activities for 10 years and their property rights for five years. "I want Papua New Guinea to have a multiracial society, but they will have to come on our terms," said the chief minister.

LONDON

One of the world's most talented linguists is a diffident Highland Scot who has spent a lifetime learning 44 languages but cannot speak the mother tongue of his homeland, Gaelic. George Campbell, 62, can talk freely to peoples from the five continents but when he goes home to the rugged highlands of his native Ross and Cromarty in Scotland he is almost lost for words.

BAYONNE, FRANCE

The Basque republic was wiped off the map of Europe nearly 40 years ago, but its government still meets regularly in exile and claims the total support of its people. The government administered a population of less than two million for just eight months during the '936-39 Spanish civil war and many of its original members are dead. But it carries on.

Lutheran Ceremony Unites Lester-Glass

Abiding Saviour Lutheran Church was the setting on Friday evening, July 25 for the marriage ceremony of Miss Melissa Ann Lester and John Roy Glass. Parents of the couple are Mr. and Mrs. Jimmy M. Lester and Mr. and Mrs. Donald L. Glass, all of Cameron.

Pastor John Homerstad performed the ceremony before the altar decorated with baskets of white gladiolas, baby's breath, and commode fern flanking brass candelabras holding votive candles. Nuptial music was provided by Mrs. William Kelm.

Given in marriage by her father, the bride wore a formal A-line gown of candlelight silk organza over peau-de-sole. The empire bodice and deep cuffs on the sheer bishop sleeves were overlaid with chantilly lace. Hand peried Venice lace enhanced the sweetheart neckline, bodice edge, and cuffs. The gown's hemline curved into a godet of chantilly lace in front and swept to a chapel train which was traced with hand clipped lace motifs.

A Juliet headpiece of organza and lace held the bride's triple-tiered illusion veil. Her bouquet was a cascade of yellow miniature roses, baby's breath, and white cattleya orchid laced with pearls and knotted satin streamers. Honor attendants were Tina Michelle Lester, sister of the bride, who was maid of honor, and Jack Glass, twin brother of the groom, who was best man.

The maid of honor wore a lemon chiffon princess silhouette gown flocked with pastel flowers. The bodice had a sweetheart neckline, large puffed sleeves, and back sash. The skirt had a deep flounce. Her flowers were a nosegay of pink sweetheart roses, blue carnations, and baby's breath.

The bride's mother wore azure blue chine knit banded with silk alaskine and the groom's mother wore beige doeskin with brown velvet trim. Both mothers wore

white phalaenopsis orchids.

After the ceremony, the bride's parents hosted the reception at their home. Mrs. Jack Glass and Mrs. Bill Dase presided at the bride's table.

The newlyweds are at home at 1102 North Houston since returning from their Las Vegas honeymoon. The groom is associated with Glass The Florist in Cameron.

MR. AND MRS. JOHN GLASS

Party Fetes Mrs. Kirk

A surprise birthday party honoring Mrs. Martha Kirk was held Wednesday night, August 6 at the home of Mr. and Mrs. Wesley Crouch. Guests for the occasion numbered 35.

Out of town guests were Mrs. Bobby Elliott, Scott, and Stacey of Elgin.

Hostesses were Mrs. Lois Crouch, Mrs. Lena Tucker, and Mrs. Flora Kirk. Sarah Crouch baked the birthday cake.

Senior Citizens To Meet Here Tuesday

Senior Citizens will meet for their monthly get-together at the Community Center in Cameron Tuesday starting with a coffee at 10 a.m.

At 10:30 arts and crafts will be led by Mrs. Paul Olbrich. There will be a covered dish luncheon at noon and games will follow lunch.

All area senior citizens are invited to attend and join in the fellowship.

In Shropshire England, it is said that a piece of hawthorn cut on Holy Thursday will protect both house and person from being struck by lightning.

Ice Cream Supper Fetes Miss Osada

Mr. and Mrs. Milton Wright Jr. hosted an ice cream supper recently introducing their guest, Miss Masako Osada, a Lion's Club exchange student from Japan.

About 30 Eastern Star members, family, and friends gathered for the ice cream and cake brought by members of the Chapter and enjoyed talking with Miss Osada.

Masako was beautifully dressed in a style native to her country and graciously responded to the many questions put to her.

Federal Retirees To Meet Wednesday

Birth

To Mr. and Mrs. James C. Beasley of Rt. 2, Cameron, a girl, Michelle Lea, 6 pounds 7 ounces, born August 5 at 3:36 p.m. at St. Edward Hospital. She was greeted by one sister and two brothers. Grandparents are Mrs. Vera Humphreys of Post, Mrs. Bennie Kile of Abilene and Curtis Beasley of Arlington. Great grandmother is Mrs. Bessie Blackwell of Waco.

HERALD SPORTS

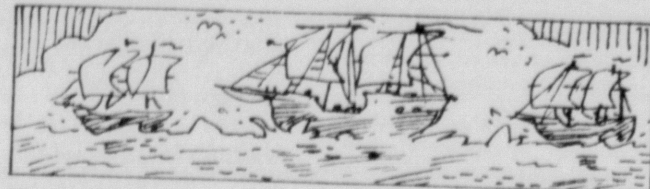

Page 6 Cameron, Texas, Herald, August 11, 1975

Woman Athlete To Head UT Athletics

A woman athlete who is considered a world-class softball player has been appointed director of intercollegiate athletics for women at The University of Texas.

Dr. Donna A. Lopiano will be responsible for a UT program that is expected to draw 140 to 150 women athletes

for intercollegiate competition in seven sports during 1975-76. Previously named three times as the most valuable player in U.S. Softball Championships, Dr. Lopiano has been assistant athletic director at Brooklyn College for several years.

The first convoy of ships that took criminals to Australia was called the First Fleet, and in time, to be a descendant of a "first fletcher," became a matter of pride.

Courts Near Completion

Tennis court construction at the City Park should be finished within the next two weeks, according to A. W. McCullin, project director.

"The wire has been installed and now we are waiting on the asphalt crew to return and lay the courts, which should only take a couple of days," McCullin said.

The foundation has been laid and has been placed on a 6-inch layer of crushed limestone and a layer of asphalt 1 1/2-inches will be rolled on.

After the asphalt, which is a special mixture made for tennis courts, Texas Power and Light will install wide outside the courts perimeter. The fences will then go up with a 12-foot fence across the sides of the courts and a 4-foot fence enclosing the entire court.

The Community Development Agency is in the process of acquiring property for the O. J. Thomas area playground.

During August playground equipment will be purchased for the park, according to McCullin.

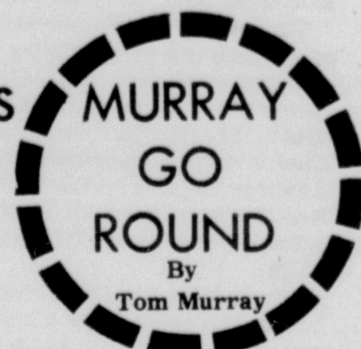

There have been several contributions for the park and the list includes Ladies Auxiliary of the Chamber of Commerce, \$500; Mrs. O. J. Thomas, \$500; Hill Country Community Action Assoc. and local representatives, \$1851.

Tennis Court Pledges: Noon Lions Club, \$1600; Evening Lions Club, \$1,600; Rotary Club, \$1,000; and the Knights of Columbus, \$200.

TENNIS COURTS are presently under construction at the city park. Construction should be completed within the next two weeks.

Odessa Drops Indians In State Finals, 3-2

B&B jumped ahead with a 2 run surge in the third and maintained a 5-2 advantage over the Indians.

The bottom half of the third Cameron poured on the running with a 6-5 lead in the bottom half. The lead continued and mounted with the Indians leading 9-5.

Both teams came out strong and with an exchange of hard hitting, the score began to see-saw. At the end of the sixth the score

The Cameron Indians fell victim to some timely hitting, fielding, and pitching by the State National Bank of Odessa and dropped the final game of the '75 Freshman League State Tournament at Robinson Thursday night, 3-2.

The rugged Cameron Indians dished out punishment to Robinson in the semi-finals in a seven-inning victory over B&B Sporting Goods of Robinson.

Robinson took an early lead in the first game Thursday with a 3-0 in the top of the first, but the Indians closed the gap in their half of the second, 3-2.

Odessa 102 000-2 4 1
Cameron 000 230-2 4 5
Sanchez, Glidwell (2), Cobos (4) and Martinez, Vrazel, Sapp (4), Gaskey (5) and Mondrick, W - Cobos, L - Vrazel, 2B - Cameron, Mondrick HR - Odessa, Cobos.

Golfers who find themselves in Dallas with a little time on their hands are in for a treat. Instead of hustling the hotel for a crowded course or leaning on the local pro to get 'em in at some Dallas Country Club, they'd be doing a personal favor to Number One by hauling it only 20 miles up North Central Expressway to play Don January and Billy Martindale's beautiful 18-hole Plano layout.

January, back on the Pro Golf Tour, and his former North Texas National Championship Teammate Martindale have designed and furnished a beautifully wooded course with steep hills and natural hazards that are the marvel of a beginner and a challenge to the par golfer.

They have all the equipment any fancy County Club provides but the new course is municipal with all swingers welcome for modest fees.

Why am I selling Don January? Did they let me play free or will they in the future? Nope. I simply had to hustle a golf course for Son Mike and myself and remembered my onetime Air Force Adjutant, Captain Donald January, was based in Dallas.

In trying to contact Don for a recommendation (He was away on the Tour) his course was discovered.

Try it. You'll like it.

QUICKIES:

George Woodard, the Aggie bull, the 230-pound Van Vleet youngster is going to be a marvelous college full-back. But, off his performance in the High School All Star game at Fort Worth Friday, you'd have to say he's no Earl Campbell. Quarterbacking in the All-Star contest, won 14-0 by the South, was subpar but the defense was stupendous. On both sides. Imagine the South defense, led by Brazoswood Linebacker David Hodge (6-4, 230 headed for UH) and Baytown Sterling Defensive End Steve Timmonds, Texas bound at 6-1 and 230, shutting off Billy Sims with 31 yards in nine carries. The Hooks Hoss, wrapped and delivered to Oklahoma had never been held to less than 130 yards in 38 consecutive games.

Ledbetter Lake Project Completed

The Ledbetter Lake project has been completed and will soon be open to the public for fishing. The lake was cleaned and 4'7" of silt was removed in order to upgrade the quality of the lake.

The project was conducted by the city parks department and the Cameron Noon Lions Club. The Lions Club donated a total of \$4,000 to that project.

The lake will be stocked for fishing by Joe Glaser and the state fish hatchery.

WE ARE PROUD OF OUR LL INDIANS, FIRST RUNNER UP IN THE STATE PLAYOFFS LAST WEEK. CONGRATULATIONS TO ALL OF THE PLAYERS THEIR COACHES AND THE MANY LOYAL FANS WHO WERE ROOTING ALL THE WAY.

AWAY WITH WASTE

If, like many homemakers, you've been thinking about purchasing a compactor, there are a few facts you ought to consider before you start shopping.

Most compactors reduce the bulk of your trash to a fraction of its original volume in less than a minute.

Some trash bags are made of two-ply, wet-strength treated kraft paper, with a polyethylene liner. They are constructed to withstand scratching, tearing, and being dragged over pavement.

As common sense can tell you, certain items, such as paint, oil-soaked rags, fish and poultry leavings, grapefruit rinds or aerosol cans should not be put into the compactor.

Some compactors, such as the TRASH MASHER compactor made by Whirlpool, come with a safety lock, emergency stop button, and an automatic deodorant spray similar to a room freshener, that works each time the drawer is closed.

Essentially, it's not rubbish to say that you should make a compact with yourself to know what you want when you shop for a compactor.

Aching, hot, tired feet? Get soothing pure Vitamin E Foot Lotion at Dusek Pharmacy.

Panama, Travel And Financial Crossroads, Builds World Trade And Convention Centers

You learned all about the Panama Canal in school, right? Which direction do you sail when you cross the Canal from the Atlantic to the Pacific Ocean? East to West? Wrong!

The answer to that question is among the many oddities about Panama that Jose Rogelio Arias, Jr., the dynamic master-planner of Panamanian tourism, likes to entertain Americans with. U.S. educated (University of California), Arias knows that most Americans think of Panama as "only a canal." Now, as general manager of the Panama Government Tourist Bureau, he reminds them that his country has a most remarkable geography that offers scenic and cultural variety for the pleasure traveler and an orientation that today truly makes Panama more of a "crossroads of the world" (as its license plates boast) for the businessman.

Panama is like a gently curving "S" lying on its side, with Central and North America to its west and South America on the east. That's why the Panama Canal runs approximately north to south, instead of east to west, why only in Panama does the sun rise in the Pacific and set in the Atlantic and why Panama City will open in 1977 an architecturally unique, 3,000-seat Convention Center and a World Trade Center.

A World Trade Center in

a country with a population of only 1.5 million? The international business community doesn't think it's such a wild idea. After all, more than 70 different banks (80 per cent of them foreign ones) operate in Panama, and they include financial institutions from the U.S., Canada, Great Britain, Spain, Holland, West Germany, Taiwan, Switzerland, Japan, South Korea, Colombia, Brazil and Venezuela. Panama's financial stability, favorable investment climate and strategic geographic location have brought them here. For representatives of foreign businesses, Arias has envisioned a 20-story round tower rising out of one of the two lagoons adjacent to the new Convention Center.

The two lagoons represent the Atlantic and Pacific and symbolize the fact that this will be the world's first and only two-ocean Convention Center. Fish indigenous to each ocean will be stocked in the respective lagoons, subtle reminders from Arias that the Atlantic and the Pacific are only 50 miles (and a few air minutes) apart and that the best fish-

ing in the world awaits convention delegates. Panama (which means "abundance of fish") is the Black Marlin Capital of the World, and more than 35 deep-sea fishing records have been made in its waters. Inside the Convention Center, its key chamber, a 3,000-seat theatre, will accommodate not only conventions but have complete stage facilities for light operas, concerts, theatrical performances and films. Separate conference and banquet areas can accommodate 3,000 persons at once or be divided into smaller sections for a mix of banquets, exhibitions and conferences. Audio-visual and communications equipment will include the most sophisticated facilities for simultaneous translations. Exteriors will reflect pre-Columbian art.

New hotel facilities in Panama City will match the demand for convention delegate housing. "Panama could use the rooms now," Arias laments, as he counts the large groups of prospective conventioners and sales-rewarded travelers he's had to turn away from "the crossroads of the world."

ETIQUETTE

After the bride-to-be has enjoyed the never-to-be-forgotten pleasure of helping select her ring, she does not see it again until the groom slips it on her finger at the wedding. As a rule the happy couple go together to the jeweler to choose and fit the wedding ring. After the engraving has

been done, the jeweler sends the ring to the groom's house or to that of the best man.

The wedding band is usually engraved on the inside with initials. The groom's first—since it is his gift to his bride—such as "J.M. to A.C.," and the date. If the band is wide, there may be room for engraving any appropriate sentiment.

If the groom wants to wear a wedding ring, he should select a plain, masculine band—and wear it on the fourth finger of the left hand, the same finger the bride's ring encircles.

Her band—and his—will match the metal of her engagement ring. Increasingly, platinum is being chosen by brides who have learned its advantages—both aesthetic and practical. Besides its exquisite, tarnish-proof shining appearance, rare, precious platinum is called the noblest of metals because its resistance to corrosion is superior to gold, silver, titanium and stainless steel.

Happy is the bride platinum shines on. It will keep shining as long as love itself—and never have to be polished, ever!

HENRY HILL

U. S. Air Force Lieutenant Colonel Henry C. Hill, son of Mr. and Mrs. H. C. Hill of 704 E. Gillis, Cameron, has arrived at Ko Kha Thailand, for duty as commander of the 17th Radar Squadron, a unit of the Pacific Air Forces.

Colonel Hill previously served at Eglin AFB, Fla. A 1952 graduate of C. H. Yoe High School, he received his B. S. degree in 1956 from Texas A&M University where he was commissioned through the Air Force Reserve Officers Training Corps program.

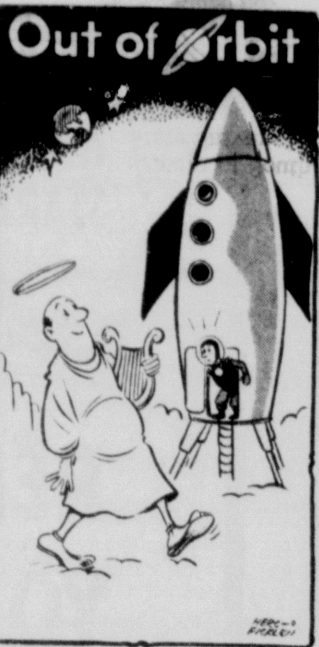

The colonel's wife, Jimmie, is the daughter of Mr. and Mrs. Herbert L. Colburn of Lampasas.

JUSTIN WALLACE

Navy Ensign Justin L. Wallace, son of Mr. and Mrs. V. L. Wallace of Rosebud, has completed the basic phase of naval flight officer training at the Naval Air Station, Pensacola, Fla.

The 26-week course includes ground and inflight instruction on aircraft navigation, meteorology, electronics, and the operation of airborne radar and computer systems. It is designed to prepare students for advanced training leading to their designation as flight officers.

He is a graduate of Southwest Texas State University, San Marcos, Tex.

Registration Set For TJC Classes

Preregistration for evening division classes at Temple Junior College will be held on Monday and Tuesday, August 11 and 12. The Admissions and Records Office will be open from 6:30-8:30 p.m. for preregistration.

Counselors will be available to assist students with course selection. Students may also preregister any weekday from 8 a.m. to noon, and 1-5 p.m.

TJC night school students can complete registration by mail if they preregister prior to August 15. After preregistration, students will be mailed a statement for their tuition and fees. All students who make payment on or before August 18 will not be required to report for registration on the evening of August 26.

Any student who does not make payment of tuition and fees by mail is required to complete registration on Tuesday, August 26 between 5:30 and 8 p.m. in the Fine Arts Building.

Students may contact the Admissions and Records Office at TJC, 773-9961 Ext. 40, for additional information about evening division classes.
